Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either newly applied or reiterated. They constitute the complete set presently being applied to the instant application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 6, 7, 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Garimella et al. (US2005/0287560).

Garimella et al. discloses dendrimers-compositional substances composed of particles, multilayer dendrimers on the surface of these particles and amino radicals, capable of capturing nucleic acid or protein. (see figure 27 compound 9e and figure 28-34 for example). Page 10, discloses that the particles can be plastic glass beads for example which is viewed as the fine particles of instant clai 7 for example.
